Name: **Munroe Robinson**

### Photoshop Project #1

Block: **1-1**

1. How many images did you complete for this project? **3**

2. The image file you'd like me to mark for quality is called: **image2.psd**

3. Describe what you did to make your image. Tell me what pictures you combined together. Also, if you used other tools, such as the smudge tool, blur tool, liquify filter, and so on, please tell me which tools you used and how you used them.

I have created a new animal that combines a centipede's legs, the body of a walrus, the skin of a zebra, and the face of Lady Gaga. I also added in a picture of Vancouver in the background. To make the skin of the zebra match over the walrus' body, I used the Liquify filter. I used the blur tool to make the edges of Lady Gaga's hair look less cut out. Also, I adjusted the color balance of the background to make it look more green.

4. On a scale of 1 to 5, how hard do you think your image was to make? Explain why you chose that mark:

I think my image was a 5 out of 5 for difficulty. This image took me 2 classes to finish, and I tried a lot of different techniques and used a lot of different tools.

5. On a scale of 1 to 5, how good did the final image turn out? Why did you give yourself that mark?

I think my picture was a 4 out of 5 for final quality. Although I worked hard on the image, it didn't quite turn out the way I wanted it to. For example, Lady Gaga's head looks really fake on the walrus body. However, I liked how well the other images blended together.

Thanks Mr. Pelletier!
