

WEB DESIGN PROJECT

In this project, you are going to create a web site that we will be uploading to a web server for the world to see. Your web pages should:

- Be about something that interests you. You can choose any topic, but you must get teacher approval of your topic. Previous topics that have interested students in the past included sports teams, famous people, video games, TV shows and movies, and music.
- Consist of a minimum of 3 pages.
- Make use of the HTML and CSS that has been demonstrated in class and in tutorials.

MARKING SCHEME:

Aesthetic Appeal (5 marks): Does the site look appealing? Is the colour scheme appropriate? Are the text and images nicely formatted?

Navigation (5 marks): Is it easy for the user to find their way through your site from any page without having to depend on the web browser's back button?

Creativity & Originality (5 marks): Does your website demonstrate creativity and effort? Did you invent an interesting and fun product? Did you use photoshop to create some clever images about your product?

Functionality (5 marks): Is the text readable? Is the site organized logically? Are the bibliographies correctly formatted? Is spelling and grammar correct?

Code (5 marks): Is your HTML indented and legible? Are all your tags closed?

Required HTML Elements: (5 marks) Use all of the following HTML Tags for full marks:

- **Basic Structure:** <html>, <head>, <title>, <body>
- **Text:** <h1> - <h6>, <p>
- **Lists:** , ,
- **Images:**
- **Links** <a> (include both internal and external links)

CSS Elements (10 marks): Use the following CSS properties in your site effectively for full marks:

- Background Properties
- Text and Font properties
- Border and Outline Properties
- List Properties
- Link Properties

Total: 40 marks
